

## Employers' Coalition on Health

### *Select Solutions update*

**new provider...expanded procedures...**

**now available even if you use another PPO!**

**Select**   
**Solutions**

ECO, the Employers Coalition on Health, introduced last January a new innovative bundled payment product call **Select Solutions**. This product has, thus far, dramatically reduced the cost for MRIs, CT Scans and PET Scans by as much as 65% over in-network cost in a hospital setting. It has also saved employer sponsored health plans and their enrolled employees thousands of dollars on routine, out-patient procedures and surgeries that can be performed either at Rockford Ambulatory Surgery Center or Orthollinois.

ECO member companies offering Select Solutions eliminate patient out-of-pocket costs for those patients seeking these services at **Select Solutions** sites. No deductibles, no coinsurance payments and medical care allowing patients to maximize time at home to recuperate in a more comfortable location. Many employers also provide transportation service for patients to offset the inconvenience of travel to an unfamiliar place.

**NOW** ECO has more exciting news! We have added the availability of colonoscopies and endoscopies at Rockford Gastroenterology to **Select Solutions**. Plan members who are part of **Select Solutions** will pay no deductibles and no out-of-pocket cost regardless of the type of colonoscopy

you need. Self-funded Health Plans save more than 50% of in-network costs if performed at a hospital.

**Select Solutions** is now available to health plans utilizing other PPOs instead of ECOH!

Save money for your employees and your health plan when your employees choose to have designated procedures done at **Select Solutions** providers!

Employers wishing more information on how **Select Solutions** works and how much it could save your health plan should **contact Don Schreiner (dons@ecoh.email and 815-316-3901)** to see how **Select Solutions** can benefit your health plan.
